

I am a two year subscriber of XM Satellite Radio and am extremely pleased with the content offered by this company. I chose to do so because I am sick and tired of broadcast radio. It is extremely infuriating to hear that the National Association of Broadcasters is petitioning the federal government to dictate what I am permitted to hear when I pay for it. I think XM's Instant Traffic & Weather is a revolutionary idea and feel like those who drive for a living like me greatly benefit from it. I look forward to its expanding to all major metropolitan areas.
